Thank you for your generous support of our Medical Student Research Day. We greatly appreciate the time each of you committed from your busy schedule to spend an hour or more with us and provide feedback to the students on their presentation skills. Research Day is designed to give our pre-clinical medical students an opportunity to share the research they did over the summer, but also to prepare them for presenting academic/medical research in a juried forum. Your generosity as a judge demonstrates the value of service to the profession as well as a commitment to quality research in medical science.

Research Day could not happen without the generous support of each and every one of you. Thank you so much!
