What Our Genes Can Teach Us About Preventing Suicide

Virginia Willour, PhD
Associate Professor of Psychiatry
University of Iowa

When: Wednesday, February 18
2:00pm-3:00pm
Where: Seebohm Conference Room (283 EMRB)

Suicide is one of the top ten leading causes of death in the U.S. Yet, little is known about its biological basis. In this talk, Dr. Willour will discuss genetic approaches currently available to identify genetic risk factors for suicidal behavior, including whole-exome and targeted next generation sequencing approaches.
