FRIDAY, APRIL 24, 2015

1:00-2:00 PM—2117 MERF
Research Presentation
“The Therapeutic Potential of Acute Intermittent Hypoxia: Current Knowledge and Future Challenges”

Brendan Dougherty, PhD, PT
Post-Doctoral Research Fellow
Department of Comparative Biosciences
University of Wisconsin—Madison

2:00-4:00 PM—MERF Building Atrium
Poster Presentations

Please Join Us! Refreshments will be served.

Individuals with disabilities are encouraged to attend all University of Iowa-sponsored events. If you are a person with a disability who requires a reasonable accommodation in order to participate in this program, please contact the Department of Physical Therapy & Rehabilitation Science in advance at 319-335-9791.
1. Post-activation depression is modulated by electrical stimulation frequency in individuals with spinal cord injury. Yen C-L, Shields RK.

9. Skin impedance is not a factor in TENS analgesia. Vance CGT, Dailey DL, Rakel BA, Sluka KA.

10. Association between heart rate and accelerations in estimating physical activity. Byl HC, Kleckner NR, Hannasch KM, Sluka KA, Frey Law LA.

18. The walk and step down task in people after knee surgery: association with quadriceps function and patient-reported outcome. Robbins DP, Cobian DG, Williams GN.
