Examining Peripheral Mechanisms of Antipsychotic-Induced Weight Gain: a Gut Microbiome Study

Chadi Calarge, MD
Associate Professor
Departments of Psychiatry and Pediatrics
The University of Iowa

12:00 Noon, Wednesday, August 28, 2013
2117 MERF
A light lunch will be served in the MERF Atrium, 1st Floor

Inflammation Inhibition for Vascular and Autonomic Dysfunction in Obese Prediabetic Humans

Gary Pierce, PhD
Assistant Professor
Department of Health & Human Physiology
The University of Iowa

Everyone in a position to control the content of this educational activity will disclose to the CME provider and to attendees all relevant financial relationships with any commercial interest.

EDUCATIONAL OBJECTIVES: Upon completion of this course, participants should be able to describe the mechanisms of diabetes, obesity and related disease processes; effectively evaluate research findings; and provide insights and applications relevant to the diagnosis and treatment of diabetes, obesity and related diseases.

Individuals with disabilities are encouraged to attend all University of Iowa sponsored events. If you are a person with a disability who requires an accommodation in order to participate in this program, please contact the Office of Scientific Affairs in advance at (319) 335-8587.
