Hyperglycemic modulation of fetal growth and insulin signaling

Andrew Norris, MD, PhD
Associate Professor
Departments of Pediatrics and Biochemistry
The University of Iowa

12:00 Noon, Wednesday, September 25, 2013
1289 CBRB (Kelch)
A light lunch will be served

Musclin- a Novel Exercise-Induced Myokine: Potential Role in Adipose Tissue Mobilization

Leonid Zingman, MD
Assistant Professor
Department of Internal Medicine
The University of Iowa

Everyone in a position to control the content of this educational activity will disclose to the CME provider and to attendees all relevant financial relationships with any commercial interest.

EDUCATIONAL OBJECTIVES: Upon completion of this course, participants should be able to describe the mechanisms of diabetes, obesity and related disease processes; effectively evaluate research findings; and provide insights and applications relevant to the diagnosis and treatment of diabetes, obesity and related diseases.

Individuals with disabilities are encouraged to attend all University of Iowa sponsored events. If you are a person with a disability who requires an accommodation in order to participate in this program, please contact the Office of Scientific Affairs in advance at (319) 335-6567.
